

Mancuso Village Park

July 23, 2002

Dear Bernie,

When the wind is from the South-Southeast we get a foul sewer odor which persists until the wind shift. We don't know how people who live real close manage the foul odor.

We receive many, many complaints from our residents regarding this.

Also, recently we hear equipment with back-up beepers late hours at night.

We would have attended this meeting but we had prior commitments.

Sincerely,

Linda K. Krause
Manager
